

Index

Sr. No.	Date	Title	Page No.	Sign
1.	25-04-2024	Implement Feed-forward Neural Network and train the network with different optimizers and compare the results.	1-3	
2.	26-04-2024	Write a Program to implement regularization to prevent the model from overfitting.	4-5	
3.	27-04-2024	Implement deep learning for recognizing classes for datasets like CIFAR-10 images for previously unseen images and assign them to one of the 10 classes.	6-8	
4.	29-04-2024	Implement deep learning for the Prediction of the autoencoder from the test data (e.g. MNIST data set).	9-11	
5.	30-04-2024	Implement Convolutional Neural Network for Digit Recognition on the MNIST Dataset.	12-14	
9.	06-05-2024	Write a program for object detection from the image.	26-27
